

Ir. Farhan Ramadhani Irsyad Samad Suhaeb, S.Tr.Kom.

UNITY / VR SIMULATION DEVELOPER

Makassar, Indonesia · (+62) 822-5937-3263 · farhan.r.irsyad@gmail.com · <https://shorturl.at/ZeDXY>

PROFILE

Unity/C# developer specializing in VR, simulation, gameplay systems, and interactive training applications. Experience developing government and enterprise training systems for PC, VR, and Android, including heavy-vehicle simulation with Arduino hardware controls, a ~100 km real-world driving environment, and medical VR. Strong in performance optimization, vehicle/physics systems, 3D pipelines, and cross-functional development.

TECHNICAL SKILLS

Unity & Programming: Unity, C#, Gameplay Programming, Object-Oriented Programming, Simulation Systems, Prototyping, Git

VR & Simulation: VR/XR Development, Training Simulators, Vehicle Systems, Physics, Large-Scale Environments, Real-World Mapping

Optimization & Integration: Performance Optimization, Unity Profiling (basic), 3D Optimization, Arduino/Hardware Integration, PC/VR/Android Deployment

Additional: Blender, Photoshop, 3D Modeling, Programmer–Artist Workflows

SELECTED PROFESSIONAL EXPERIENCE

Software Programmer — PT. Maxxima Innovative | Surabaya | Jul 2023 - Jul 2024

- Developed Unity/C# training simulations and interactive systems for government clients across PC and VR.
- Built a VR Heavy Vehicle Simulator for rapid runway-repair training, integrating multiple construction vehicles with Arduino-based physical controls.
- Developed a ~100 km Jakarta–Bogor real-world-scale driving simulator for convoy training scenarios.
- Optimized 3D assets and environments for strict performance and hardware constraints; improved programmer–artist workflows.

Game Programmer — Dhelangan Studio | Yogyakarta | Oct 2021 – Oct 2022

- Developed a medical VR simulation using Unity/C# for a pharmaceutical client, with deployment designed to support Android devices.
- Built gameplay and interactive systems using Unity/C# for commissioned and in-house projects, including top-down shooters, simulations and training software.
- Worked across programming and 3D asset creation, supporting both technical and visual production.

Junior Game Programmer — Octaverse Studio | Yogyakarta | Apr 2022 – Sep 2022

- Contributed to mobile and PC projects including multiplayer FPS and strategic ship-battle games.
- Delivered an endless-runner mobile title and supported ongoing development cycles within a small multidisciplinary team.

ADDITIONAL PROFESSIONAL EXPERIENCE

Director / Founder — Ave Ludum Studio | Makassar | 2026 – Present

- Lead game-development projects and advise clients/developers on technical architecture, production workflows, and project execution..

Manager, Information Systems & Technology — Universitas Negeri Makassar | Makassar | Oct 2025 – Present

- Built 3D simulations and interactive visualizations for institutional events and projects; manage technical systems supporting faculty activities.
- Designed and developed a modular CSL/OSCE examination timer system with configurable station rotation, timing, and duration.

EDUCATION & QUALIFICATIONS

Professional Engineer Program (Computer Engineering). Universitas Negeri Makassar, 2024

Bachelor of Applied Computer Science (Game Development). STMM MMTC Yogyakarta, 2019 - 2023

Program S2 Pendidikan Teknologi dan Kejuruan. Universitas Negeri Makassar, 2026 – est. 2028

Unity Certified User: Programmer. 2024

IELTS Academic. Overall 8.0, 2025

Languages: Indonesian (Native) · English (IELTS 8.0)
